## **NATIONWIDE CHEMICAL COATING MFRS., INC.**

### **Celebrating 47 Years of Excellence**

**Sarasota, Florida, January 1st, 2011** - NATIONWIDE CHEMICAL COATING MANUFACTURERS, INC., 7106 24th Court East, Sarasota, FL 34243 is celebrating their 47th year of manufacturing excellence. Nationwide has been making environmentally friendly Paint and Coating products since 1964. Continued research and development keeps Nationwide on the cutting edge of the technology of high performance waterborne products. These latex products have improved to the point of surpassing the performance levels of solvent based products with lower cost, ease of use, better results (gloss retention and chalk resistance) and almost no odor during application. In addition, since latex products are water based, they also provide increased job-site safety, no flammability and low health risk. Compliance with regulatory authorities relating to reduced Volatile Organic Compound (VOC) emissions has been, and continues to be, Nationwide's highest priority with almost all of their products meeting or well below EPA's mandated emission levels without sacrificing quality or performance. Several products feature Zero VOC levels.

Nationwide produces over 100 high quality waterborne products with an extensive line of ceramic filled insulating and soundproofing paints and coating for residential, commercial and industrial applications.

- Several new product lines have been introduced in the past few years including:
- Enviro-3000<sup>®</sup> - Zero VOC Interior Ceramic Paint
- Enviro-4000<sup>®</sup> - Zero VOC Exterior Ceramic Paint
- Super Ceramic One Kote<sup>™</sup> - Premium Quality, High Hide, Single Coat Exterior or Interior Paint
- Ultra Force<sup>™</sup> - Hybrid Elastomeric Exterior Paint
- Enviropoxy<sup>™</sup> - Heavy Duty Two Part Waterborne Epoxy

Orders, information and inquiries for all products and sundries are available via the Internet @ [www.Natiowidecoatings.com](http://www.Natiowidecoatings.com)
